

Duck Out to Enjoy the Holiday Lights

Pattern is reversed for fusible applique; if you prefer traditional applique or redwork, reverse the design.

General directions:

Adjust pattern to desired size and cut background fabric. As shown, a 7" X 9" background was used. Trace pattern using a light box onto paper side of paper-backed fusible webbing. Cut out pattern pieces and iron to wrong side of fabric. Cut out fused pieces on lines, and fuse to background fabric in the order specified by the pattern piece numbers. Finish the edges by satin stitching or whatever method you prefer. Eyes and details may be added by painting or using fabric markers; embellish as desired.

Holiday decorations in the sample were added using fabric with star-like prints; beading and sequins were also used to create desired effects.
