

## Duck In the Sewing Room for Quilting Time

Pattern is reversed for fusible applique; if you prefer traditional applique or redwork, reverse the design.

### Directions:

Adjust pattern to desired size and make background. As shown, a 7" X 9" background was prepared by piecing the "design wall" block and surrounding it with additional background fabric; then adding the fusible applique. Trace pattern using a light box onto paper side of paper-backed fusible webbing. Cut out pattern pieces and iron to wrong side of fabric. Cut out fused pieces on lines, and fuse to background fabric in the order specified by the pattern piece numbers. Finish the edges by satin stitching or whatever method you prefer.
